

Denbighshire County Council in North Wales deliver their services from four major offices, with their main office in Ruthin.

## m-Power gives Denbighshire County Council more than a typical BI tool

“We needed access to information from our finance systems and looked for a **web-based tool that offered more than the usual BI tools**. We needed something for power users in the financial systems team and after looking at the market we selected m-Power from mrc. It’s **very cost effective and has a very short learning curve**.

### Delivering data to PCs and tablets

m-Power **saved us many weeks of repetitive manual spreadsheet work** and delivered new functionality beyond our previous capabilities. Finance now does real value-add for budget holders within the council.

m-Power delivers great end results--our users don’t even need training; we just give them the apps.

m-Power also lets us **pull data together from multiple systems and deliver it cleanly to users on PCs and tablets**. For example, we now provide our heads of service and directors with key information on their iPads.

### Improving processes with BI apps

m-Power improved processes in every department, and saves us months of time.

**We deliver more with no need to grow our staff**. I’d recommend m-Power to anyone.”

“We’ve dramatically modernised the delivery of financial information”

**Rhys Lloyd Jones**  
Financial Systems Manager
